

# Aircraft Interiors Engineering Services

## How CDG Can Help

- **Worldwide** – experienced engineers available across USA, UK, India
- **Experienced** – 40+ years of aviation and aerospace program experience
- **Flexible** – able to ramp up / ramp down to your changing schedule requirements
- **Affordable** – blended global team pricing options for significant cost savings
- **Reliable** – backed by the Boeing reputation for high quality and reliability
- **Accurate** – our quality processes support our “right first time” approach to quality

CDG offers aircraft interiors engineering resources and services to help you meet your critical project milestone deadlines. CDG's Engineering Services include:

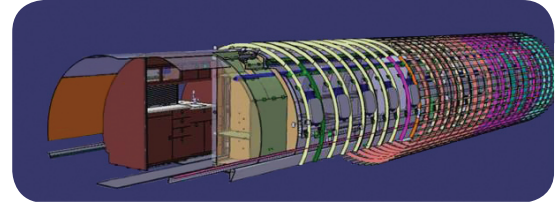

- Concept & Design
- Stress Analysis
- 3D Modeling
- Drafting / Detail Design
- Installation Drawings
- Systems Integration
- CAD Data Conversion
- Technical Documentation
- On-Site Installation Support
- Project Management – Local or Global Projects

## Proven Experience

CDG's resource pool includes experienced engineers with broad interiors systems knowledge, including Boeing 787 program experience on:

- Emergency Equipment
- Lavatory & Galley
- Water & Waste Systems
- Seating
- Production Support
- Cargo Systems

## Flexible Options for Your Project Requirements

- **On-Site or Offsite? You Decide.** If you have data security or project control concerns, we can co-locate CDG engineering staff on-site at your facility if needed. We can also take your project and perform your work at any of our offices worldwide.
- **Offshore or Onshore? You're In Control.** You decide what level of your project is outsourced to each of our various global locations to suit your budget or information control requirements, or let us help you select the best options.
- **Peace of Mind with Hassle-Free Local Project Management** - CDG project management leaders will be local residents from your region. If you utilize our combined teams across US, UK and India, we coordinate project status and communications across all global teams and time zones, so you don't have to. You deal directly with your local Project Manager.

**Contact us** to discuss your project requirements today. We look forward to working with you to meet your milestone deadlines and reduce your engineering costs, without sacrificing quality.
