

Hyland Software Forms Value Added Reseller Relationship with Boeing Subsidiary CDG

AIIM Expo – Exhibit Booth # 108 / 110

CYPRESS, Calif., March 17, 2005 – Continental DataGraphics (CDG), a subsidiary of The Boeing Company [NYSE:BA], today announced that it has formed a value added reseller relationship with Hyland Software, Inc., developer of the OnBase® enterprise content management (ECM) software suite. CDG provides scanning, software applications, system integration services and secure data hosting solutions to its customers in multiple industries. Under the terms of this agreement with Hyland, CDG will now be able to offer OnBase as an option to its customers seeking an electronic document management system solution.

“In order to better support our customers, CDG sought to expand its portfolio of software offerings to complement and accompany our document scanning, system integration and data hosting capabilities,” said Michel Zala, VP of Sales and Marketing for CDG. “We were pleased to be able to form this partnership with Hyland, as we clearly recognize the strong and proven reputation of the OnBase application in many of the industries served by CDG.”

The newly formed VAR alliance relationship with Hyland will enable CDG to offer its scanning, conversion and indexing services combined with OnBase as a comprehensive ECM software solution. These services can be combined as needed with system integration services to facilitate access to any data in legacy systems. CDG can also provide secure, remote hosting of applications and databases if required.

Bill Priemer, Hyland’s Vice President of Sales and Marketing, commented, “We look forward to working closely with CDG in this new VAR alliance relationship. Because of their presence in aerospace and trucking, as well as many other industries, we felt they were a solid partner to help introduce the OnBase solution to multiple market segments.”

About CDG

Continental DataGraphics (CDG) is a wholly owned subsidiary of The Boeing Company. Established in 1969, CDG provides a comprehensive suite of products and services for the creation, conversion, management and delivery of information. CDG’s offerings include document and content management solutions, digital imaging services, secure application and data hosting services, technical authoring and illustration, and engineering offload services. About Hyland Software

Hyland Software, established in 1991, is a leading provider of rapidly deployable enterprise content management software. Hyland develops OnBase, enterprise-class software that combines integrated document management, business process management and records management in a single application. OnBase allows organizations to manage digital content, including scanned paper documents, faxes, print streams, application files, electronic forms, web content, multi-media files, and emails. OnBase is used by businesses and government agencies to automate business processes, reduce the time and cost of performing important business functions, improve organizational efficiency and address the need for regulatory compliance through the management, control and sharing of digital content with employees, business partners, customers and other constituencies. Visit www.onbase.com for more information.
