Inmedius® S1000DauthorPro™ XE

Browser-Based WYSIWYG Editor for S1000D Projects

Comprehensive, intuitive and affordable S1000D authoring solution

Ensure Quick Startup and Delivery of Single or Multiple Projects

Simpler to use than a traditional XML editor, AuthorPro XE provides complete control to edit XML content. WYSIWYG technology helps to streamline the complexity of the S1000D specification, and enables authors at multiple sites to quickly understand and begin work on new projects. No additional tools or installations on remote user systems are necessary – all S1000D authoring functionality is included, easily accessible in a browser-based interface.

AuthorPro XE, together with the integrated Inmedius S1000D Publishing Suite™, offers an end-to-end solution to successfully manage the entire S1000D technical documentation lifecycle – from authoring to content management and publishing.

Key Benefits

- Quickly, easily create S1000D content with schema-based validation
- Concentrate more on content, less on presentation with WYSIWYG editing
- Additional Tags or Text authoring modes also available for more detailed control
- Work remotely from any location with web access
- Improve project turnaround and reduce delivery times
- Significantly less time for software installation

inmedius® S1000D authorPro™ XE

Key Features

Deploy Web-based CSDB for Easy, Low Cost Distribution

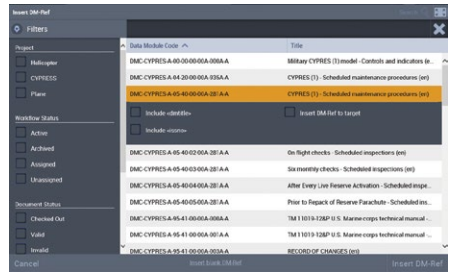

The browser-based editor integrates directly with Inmedius® S1000Dmanager™ on multiple levels. With this streamlined integration of the authoring and management applications, authors and project managers have a single point of visibility and access to data stored in the Common Source Database (CSDB).

Multiple Editor View Options

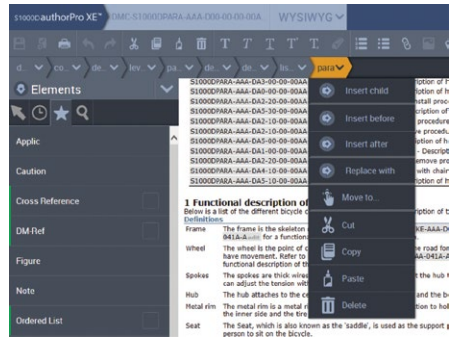

Select WYSIWYG, Tags or Text authoring modes to write, manage and retrieve Data Modules that comply with S1000D requirements. AuthorPro XE ensures that S1000D project rules are automatically enforced, so authors focus more attention on creating quality technical content.

Utilize Advanced S1000D Tools

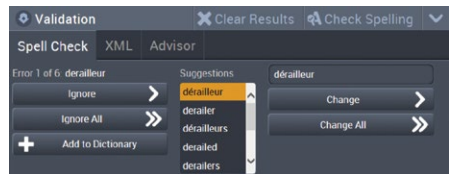

Quickly and easily create S1000D-compliant content, with advanced features including integrated cross referencing and management, project and language configurations, data reuse, graphic and hotspot integration, and data module validation and integrity checks.

Easily embed the online S1000D editor on a web server and eliminate the need to install software at remote office locations.

Generate and deliver documents that are compliant to the specification with speed and accuracy.

Conduct a quick validation against business rules before sending data modules through the quality assurance workflow.

S1000D Publishing Suite™

The Inmedius® S1000D Publishing Suite™ offers an end-to-end solution to support the entire S1000D documentation lifecycle. These integrated applications create, organize and distribute data and technical information assets in a performance-oriented environment.

Inmedius Spectrum™ Architecture

AuthorPro XE v6.0 leverages the newly developed Inmedius Spectrum™ architecture, designed to enable enterprise-level installations with significantly enhanced system performance, security and resource optimization capabilities. Inmedius Spectrum provides a browser-based, scalable architecture that facilitates management, authoring, and publishing of technical data, with capabilities to support multiple aircraft and other commercial and defense equipment programs with very large data sets. Inmedius Spectrum also enables deployment in a cloud-based environment if required.

Other Services provided by CDG

Technical Publications

Authoring & Software

- Aviation technical publications
- S1000D, ATA, numerous military specs
- Inmedius® software

Engineering Learning Media Solutions

- eLearning Content Development
- 3D Modeling and Simulation
- Focus on Equipment Operations and Maintenance

Integrated Design &

Certification Services

- EASA.21J.536 Design Organisation Approval
- Aircraft Interiors Engineering Design
- Major and Minor Change Approvals
