

Inmedius® S1000Dprism™

Inmedius® S1000Dprism™

Flexible S1000D Viewer: Online, Standalone & Mobile

Save time and increase productivity with the browser-based viewer system

Newly Renamed Browser-Based Viewer Provides Powerful Data Access

With a new mobile deployment option, a flexible browser-based interface and other extensive architecture improvements, Inmedius® S1000Dinteract™ has a new name: Inmedius® S1000Dprism™.

Prism is the ultimate tool for viewing S1000D information compiled from the Common Source Data Base (CSDB). With a familiar browser-based environment, Prism organizes and simplifies the navigation of massive amounts of highly detailed documentation, delivering streamlined and robust Interactive Electronic Technical Manuals (IETMs).

A responsive layout allows the user interface to reconfigure itself based upon screen size. Whether used on a desktop, laptop or touchscreen device, Prism maintains the same appearance and behavior across platforms. Users feel at ease and proficient with access to annotations, bookmarks, change bars, search and other advanced features. A flexible architecture allows quick and easy customization to accommodate customer-specific requirements for presentation, while maintaining the integrity of the source data.

Prism, together with the integrated Inmedius® S1000D Publishing Suite™, offers an end-to-end solution to successfully manage the technical documentation process.

Key Benefits

- View S1000D documents in a familiar browser-based environment
- Mobile device access license option available
- Supports both connected and disconnected operations
- Accommodate customer-specific requirements
- Significantly less time for software installations
- Search for information quickly and easily

Key Features

Consistent Presentation

Create consistency and structure by presenting information in exactly the same format on paper as on screen. Users experience a consistent look throughout the viewing process.

Highlight Changes

Emphasize data changes, enabling users to quickly locate and review updated content.

Standalone or Server-Based Access

The browser-based user interface of Prism enables access to content in both standalone and server-based environments, without the need for time-consuming software installations on additional machines. Prism also works in conjunction with existing authoring and management tools, automatically formatting and displaying the composite information.

Prism represents each manual as a card, showing the current status icon, manual title, ID, language code and date. A simple click on the icon opens a manual. A swipe or click brings up additional actions for system administrators.

inmedius[®]

S1000D Publishing Suite™

The Inmedius® S1000D Publishing Suite™ offers an end-to-end solution to support the entire S1000D documentation lifecycle. These integrated applications create, organize and distribute data and technical information assets in a performance-oriented environment.

Inmedius Spectrum™ Architecture

Prism v6.0 leverages the newly developed Inmedius Spectrum™ architecture, designed to enable enterprise-level installations with significantly enhanced system performance, security and resource optimization capabilities. Inmedius Spectrum provides a browser-based, scalable architecture that facilitates management, authoring, and publishing of technical data, with capabilities to support multiple aircraft and other commercial and defense equipment programs with very large data sets. Inmedius Spectrum also enables deployment in a cloud-based environment if required.

Other Services provided by CDG

Technical Publications

Authoring & Software

- Aviation technical publications
- S1000D, ATA, numerous military specs
- Inmedius® software

Engineering Learning Media Solutions

- eLearning Content Development
- 3D Modeling and Simulation
- Focus on Equipment Operations and Maintenance

Integrated Design &

Certification Services

- EASA.21J.536 Design Organisation Approval
- Aircraft Interiors Engineering Design
- Major and Minor Change Approvals
